
Metabolomic changes upon SLC38A4 overexpression (HEK293 cells)
System A substrate
Urea-cycle intermediate
Carbamoyl-phosphate pathway
Oxidative stress
Other significant
Not significant
N-Carbamoyl-L-aspartic acid
Ethylmalonic acid
Taurine
Lysine
Threonine
Orotic acid
Histidine
Serine
Alanine
Asparagine
Citrulline
Glycine
Argininosuccinic acid
Glutathione oxidized
Valine
Arginine
Proline
Aspartic Acid
N-Acetylglutamic acid
FDR = 0.05
−log10(adjusted p-value)
log2 fold-change (SLC38A4 OE vs control)
